Rich,

Here's our draft source control decision (SCD) for Portland Shipyard OU3. Let me or Dave Lacey know if you want a hard copy of the SCD. I'll ask if you can review it & submit any comments you may have in 45 days..., 7/16/12.

Please call or reply if you have any questions about our draft SCD.

Subject: Draft Source Control Decision for Portland Shipyard Operable Unit 3

Good day, everyone!

This is a head's up that DEQ will soon submit a draft source control decision (SCD) for the Portland Shipyard Operable Unit 3 (OU3) to EPA for review & comment. As always, I'll send a 2<sup>nd</sup> e-mail to you all when we submit the draft SCD to EPA & offer you an opportunity to review & comment.

The Portland Shipyard is located at the end of Swan Island near RM 8. DEQ has been working with both the Port of Portland (the former property owner) & Vigor (the current property owner/operator). The Port's work has focused on the existing contamination on the site at the time the Port sold the property to Cascade General/Vigor (2000). DEQ has been overseeing the Port's work on both an upland RI/FS & source control for that existing contamination, while DEQ has been overseeing Vigor's work on stormwater source control. OU3 is a 2-acre parcel on the Swan Island Lagoon side of the island. Our SCD will be that the site has been adequately characterized..., & with the stormwater lines & catch basin cleanouts..., does not pose a current or reasonably likely future source control threat to the river.

We expect to submit the draft SCD to EPA in the next week or two, & will ask EPA for a 30-day review turn-around.
